Dr. J. Scott Angle is the Vice President for Agriculture and Natural Resources at UF/IFAS and is a national leader in developing the science that supports food production and management of natural resources. As chief executive of the University of Florida’s Institute of Food and Agricultural Sciences (UF/IFAS), one of the nation’s leading land-grant institutions, he champions public agricultural and environmental science as a path to improve lives and reduce human suffering. His accomplished career in government, non-profit international development, and academia informs an approach to leadership based on service, partnership, and drive for impact. An innovator who holds seven patents, Angle has successfully guided multiple organizations through budget shortfalls and other challenges. Dr. Angle leads nearly 2,300 employees who work in all 67 Florida counties. UF/IFAS encompasses the College of Agricultural and Life Sciences, the Florida Cooperative Extension Service, and the Florida Agricultural Experiment Station.

Dr. Lisa House is Chair of and a Professor in the Food and Resource Economics Department at the University of Florida. She serves as Director of the Florida Agricultural Market Research Center. Dr. House holds a teaching and research appointment. She teaches classes in food and agribusiness marketing and management, survey research for economists, and comparative world agriculture. Her research interests focus on consumer preferences and demand for food products. Dr. House earned her B.S. in Food and Resource Economics from the University of Florida, followed by M.S. and Ph.D. degrees in Agricultural Economics from Kansas State University.

John Walt Boatright is Director of National Affairs at Florida Farm Bureau Federation. John Walt joined Florida Farm Bureau in May 2017 as the lead staff on federal issues affecting Florida agriculture. These include trade, labor, sugar, and Farm Bill policies. In this role, John Walt manages congressional affairs for Florida Farm Bureau, establishing working relationships with Florida’s 29-member delegation. He is also serving as Interim Director of State Legislative Affairs for the 2022 Legislative Session. John Walt graduated from the UF College of Agricultural and Life Sciences with a bachelor’s degree in Food and Resource Economics in 2013.
Dr. Roger Cryan joined the American Farm Bureau Federation this fall as Chief Economist. Before joining Farm Bureau, Dr. Cryan served as the Director of the Economics Division for the Dairy Program in USDA’s Agricultural Marketing Service, where he directed an award-winning team of market reporters, economists, and marketing specialists across the country, and contributed to dairy purchasing and policy across USDA. He previously served as Vice President for Milk Marketing and Economics at the National Milk Producers Federation (NMPF) and as the Economist for the Federal Milk Market Administrator in Atlanta, GA. Dr. Cryan was raised in rural upstate New York, earned his Bachelor’s degree in International Studies at the Johns Hopkins University, and his Master’s degree and Ph.D. in Food and Resource Economics at the University of Florida. LinkedIn profile: https://www.linkedin.com/in/roger-cryan/

Dr. Suzanne Thornsbury is a Senior Advisor in USDA’s Office of the Chief Scientist. In this role, she advises the Under Secretary and Chief Scientist on policy development and operational planning pertaining to agricultural economics and rural community issues including innovation and advanced manufacturing, specialty crop economics, and economics of hemp and hemp markets. Dr. Thornsbury has a Ph.D and M.S. in Agricultural and Applied Economics from Virginia Tech and a B.S. in Animal Science.

Dr. Kimberly Morgan is an Associate Professor and Extension Economist with the University of Florida’s Food and Resource Economics Department, housed at the SW FL Research and Extension Center in Immokalee, Florida. Dr. Morgan earned a BS in Animal Science, and her M.S. and Ph.D. in Food & Resource Economics, all from the University of Florida. She researches consumer demand trends specific to fresh produce/food products, and how market and financial information impacts choices that promote entrepreneurial activity and sustainable profits for agribusinesses. She investigates mitigation of human resource-related risks, such as trade-offs between hand-labor and machine-harvesting technology investment. Dr. Morgan is the UF/IFAS Farm Labor Supervisor Training Program Coordinator, an educational program designed to protect the safety, health, and wellness of farmworkers. She co-leads curricula development aimed at creating multi-disciplinary, participatory, collaborative approaches to solving wicked problems facing the agricultural industry.
Dr. Dawn Thilmany is a Professor of Ag and Resource Economics with Colorado State University, serving in that role since 1997 and now serves as the co-Director of CSU's Regional Economic Development Institute and supports Engaged Research for the Office of Engagement and Extension. She specializes in regional economic development related to local, organic and food market supply chains. She has over 100 peer-reviewed publications and presented to over 500 academic, industry and policy audiences. She Chaired the Colorado Food Systems Advisory Council and established and co-led the CSU Food Systems team through 2017, when she joined the leadership for CSU's Community Development team. She collaborated with several USDA agencies including the ERS, AMS and NIFA, and served as a reviewer or panel manager for over a dozen USDA grant programs. She has been President and led several organizations including the Agricultural and Applied Economics Association, the Western Agricultural Economics Association and the Food Distribution Research Society. She previously represented the AAEA on USDA's Advisory Board on Research, Extension, Education and Economics from 2012-18.

Dr. Andra Johnson received his M.S. and Ph.D. degrees in Forestry Resources from the Pennsylvania State University, University Park, Pennsylvania. He also received a B.S. in Urban Forest Management from Southern University and A&M College in Baton Rouge, Louisiana. Prior to accepting the position of Dean and Director of UF/IFAS Cooperative Extension, Dr. Johnson served as the Associate Director of Extension for The Pennsylvania State University Cooperative Extension Service preceded by the Vice Chancellor for Research and Technology Development at the Southern University Agricultural Research and Extension Center in Baton Rouge, Louisiana, and Assistant Director of Research at Alcorn State University College of Agricultural Research, Extension, and Applied Sciences in Lorman, MS. Dr. Johnson has served on numerous boards and committees, including participating in the Northeast Extension Directors (NEED) Monthly Meeting, ECOP Subcommittee on Workforce Development Working Group, the Northeastern Regional Association of State Agricultural Experiment Station Directors (NERA) Multi-State Activities Committee and recently on USDA’s Civil Rights Working Group. Johnson grew up on a farm in rural Louisiana. His family raised cattle and grew cotton, corn and wheat, and his aunt has worked for the USDA Forest Service for more than 30 years. Those early experiences motivated him to pursue a career in Extension where he could bring the knowledge of the land-grant university to families like his who produce our food, fuel and fiber.
Dr. Hayk Khachatryan is an associate professor in Food and Resource Economics Department and Mid-Florida Research and Education Center at the University of Florida. His research interests include consumer behavior, experimental economics, pro-environmental behavior, temporal preferences, and urban and environmental policy. Recent empirical work estimates the effects of policies and regulation on consumer behavior, such as sustainable production labeling or economic incentives for water conservation in the urban environment. Other projects integrate stated preferences and visual attention measures to investigate shopper behavior and effectiveness of point-of-sale advertising and promotions. He has published over 60 peer-reviewed articles in the economics, agricultural economics, consumer marketing, and social psychology journals, including Applied Economics, Journal of Experimental and Behavioral Economics, Agricultural Economics, PLOS One, Marketing Letters, Behavioral Sciences, Journal of Environmental Psychology, Journal of Agricultural and Resource Economics, Agricultural and Resource Economics Review, and Land Use Policy.

Dr. Marisa Zansler is the Director of Economic and Market Research Department at the Florida Department of Citrus with nearly 20 years of experience in conducting and managing economic research and policy analysis of plant health management programs. She also serves as the Chief Economist to the Florida Citrus Commission. She is responsible for overseeing the collection, analysis and reporting of economic and market research data. She earned a Ph.D. in Food and Resource Economics from the University of Florida in 2004. She also holds a B.A. in Political Science, a B.S. in Ag Business, and a M.S. in Ag Economics from Louisiana State University. She currently resides in Gainesville, FL.
Dr. Zhengfei Guan is an associate professor of food and resource economics at UF/IFAS. His research and extension work revolves around agribusiness coping strategies under changing operating environments. The goal of his research and extension activities is to help producers address production, labor, and trade challenges at both farm level and market level. He has testified at USTR and USITC hearings on trade of seasonal and perishable products. His work has been presented to the White House and policymakers at various levels of government.

Dr. Adam N. Rabinowitz is an Assistant Professor and Extension Economist at Auburn University and Alabama Cooperative Extension System. Adam holds a Ph.D. in Agricultural and Resource Economics from the University of Connecticut. His research and extension program focuses on production economics, marketing, risk management, and policy. He has authored numerous publications and participated in national conferences on these issues. With a strong real-world emphasis to his research, Adam has presented invited testimony at legislative hearings and meetings as well as serving as an invited speaker at a national farm bill conference. He is currently the Team Coordinator for the ACES Farm and Agribusiness Management Team and Graduate Program Organizer for the Master’s programs in Agricultural Economics at Auburn University. He was also the recipient of the Southern Agricultural Economics Association 2022 Emerging Scholars Award.
**CHRISTA COURT, PH.D.**

Dr. Christa D. Court is an Assistant Professor in the Food & Resource Economics Department at the University of Florida (UF), Institute of Food & Agricultural Sciences (IFAS). She also serves as Director of the UF/IFAS Economic Impact Analysis Program, which conducts regional economic analyses for funded research projects, industry organizations, and government agencies, analyzing a wide range of activities and industries. She holds affiliate faculty status with Florida Sea Grant, UF School of Natural Resources and Environment, the UF Water Institute, the UF/IFAS Food Systems Institute, the Regional Research Institute at West Virginia University, and the University of the Westfjords in Ísafjörður, Iceland. Her research interests include disaster impact assessment, regional economic modeling, economic impact analysis, and connections in human and natural systems. Dr. Court is leading numerous funded research projects involving regional economic modeling and has a growing list of related publications. She holds undergraduate degrees in Economics and Spanish from Middle Tennessee State University and Master’s and Ph.D. degrees in Economics from West Virginia University.

**XIAOHUI (SHERRY) QIAO, PH.D.**

Dr. Xiaohui (Sherry) Qiao is a Postdoctoral Research Associate in the Economic Impact Analysis Program of the Food and Resource Economics Department at the University of Florida. She holds a PhD degree in Civil Engineering focusing on webGIS development and hydroinformatics. She currently works on several projects that emphasize web-based geovisualization, disaster impact analysis (tropical storms/hurricanes, flooding, harmful algal bloom), and geographical pattern analysis of the supply chain. Her primary research interest is to leverage interdisciplinary technologies (GIS, data science, informatics) to solve research questions in agriculture and environmental science.

**DEREK FARNSWORTH, PH.D.**

Dr. Derek Farnsworth is an associate professor in the Food and Resource Economics Department at the University of Florida. His primary research interests include production economics, labor economics, and agribusiness marketing. He conducts research concerning agricultural labor markets, best management practices, and invasive species. He also teaches classes on agribusiness finance and marketing. Dr. Farnsworth received his Ph.D. in Agricultural and Resource Economics in 2014 from the University of California, Davis.
